SUMMARY

I'm a senior full-stack developer with six years of commercial experience across ad tech, payments, betting, logistics and enterprise SAP. I work across React, Laravel and Go on the web, Flutter and Kotlin on mobile, and Docker, GCP and Firebase in the cloud. Outside work I build and ship my own products end to end: a lottery-ticket OCR app on Google Play, a real-time Rust input engine, and an accessibility overlay for deaf gamers.

EXPERIENCE

Naritive · Senior Full-Stack Developer Jan 2026 – Present

Programmatic display advertising platform · naritiveglobal.com

- Senior engineer on an ad tech platform that serves social-style display ad formats to global brands.
- Build React front-ends and containerised services with Docker, deployed on Google Cloud Platform.
- Use AI tooling across development and product workflows.

Tinman · Full-Stack Developer (part-time contract) Jan 2026 – Mar 2026

Smartz Solutions · Full-Stack Developer Dec 2023 – Dec 2025

Randpark Ridge, Randburg

- Architected and built full-stack solutions with Laravel and React or Vue.js on MySQL.
- Developed Go web APIs for efficient, scalable data interchange.
- Improved database performance and optimised backend logic.
- Delivered iterative improvements with cross-functional agile teams.

WorldSportsBetting · Full-Stack Developer Aug 2022 – Dec 2023

Randpark Ridge, Randburg

- Built and maintained web and mobile apps in React, React Native, Dart, Swift, PHP and Python.
- Built modular front-ends with Node.js and Angular over REST APIs.
- Kept apps stable through rigorous testing and performance optimisation.

SAC Trucks · Full-Stack Developer Mar 2022 – Jul 2022

Broederstroom, North-West

- Maintained and extended PHP/MySQL web applications.
- Built mobile features in Flutter backed by secure REST APIs.

AddPay · Full-Stack Developer (contract) Dec 2021 – Feb 2022

Stellenbosch

- Built software for point-of-sale devices and cardless payment integrations.
- Developed WordPress plugins and cloud-based payment workflows, with Angular front-ends.

Accenture · Business Integration Analyst 2020 – 2021

Centurion, Gauteng

- Worked on Oracle Cloud integrations and SAP ABAP (S/4HANA) implementations.
- Built Python and Java automation scripts for integration with SAP systems.

Earlier · Fibre Technician & Driver, Libby Constructions (2017); Junior Real Estate Agent, Jawitz Property (2016 – 2017)

Installed and tested fibre-optic networks; built client, negotiation and communication skills in property sales.

SELECTED PROJECTS

Aimllama · [aimllama.com](#)

Rust · Kotlin/Compose · Android NDK · Firebase

- Keyboard and mouse for mobile games without an emulator. A Rust core streams the phone over ADB, upscales on the GPU and injects multi-pointer touches.
- A vision engine re-finds jittering on-screen buttons before each tap, searching small regions to stay cheap at 60–120 fps. The Android app shares the Rust core, and Play purchases are validated server-side.

Lotto Dash · [lottodash.web.app](#)

Flutter · ML Kit · Firebase · Cloud Functions (TS)

- A South African lottery app on Google Play. It scans a paper ticket with OCR and checks every board against the latest draw, across 7 games.
- Offline-first ticket sync with an optimistic queue. The backend is about 25 Cloud Function modules for nightly result polling, Play subscriptions, referrals and push alerts.

Heroes Without Sound · [heroes-without-sound.vercel.app](#)

Next.js · React Three Fiber · Three.js

- A Windows overlay that visualises game audio (direction, distance, intensity) for deaf and hard-of-hearing players. The v0.1.0 installer has shipped.

SKILLS

Languages	TypeScript, JavaScript, PHP, Go, Rust, Kotlin, Dart, Python, Java, Swift, SAP ABAP
Front-end & mobile	React, Next.js, Vue.js, Angular, Three.js, Flutter, Jetpack Compose, React Native
Back-end & data	Laravel, Node.js, Go, REST APIs, MySQL, PostgreSQL, SQL Server, Firestore, SAP HANA
Cloud & DevOps	Google Cloud (GCP), Docker, Firebase, Vercel, GitHub, GitLab, Azure DevOps
Practices	Agile delivery, AI-assisted development, API integration, payments and in-app billing

EDUCATION & CERTIFICATIONS

Project CodeX · National Certificate in IT (Software/Systems Development)

2017 – 2020

Cape Town · Java OCA SE 8 certified (2019)

Excelsior High School · Bachelor's Pass

2011 – 2015

- 2018: HackETC hackathon, second place
- 2020: IDS 805 Training
- 2023: Flutter Development Bootcamp with Dart · Google Analytics · Responsive Web Design · Front-End Development Libraries
